## SCHEDULE OF APPROVALS - JUNE 21, 1966

### Administrative Item

Claims - Settlements

1 This claim arises out of an accident occurring on June 28,1959 on Route 130, Gloucester City, New Jersey involving a vehicle owned and operated by William McKay, Philadelphia, Pennsylvania. As a result of the aforesaid accident State Highway Department owned lighting equipment was damaged and had to be repaired at a cost of $300.51. The vehicle involved was not insured and Mr. McKay, shortly after this accident, promised to pay off this claim in monthly installments. Mr. McKay has paid the sum of $30.00 on this claim to date, and this office had been unable to ascertain his present whereabouts until we received a letter from a Philadelphia attorney in November 1965 stating that Mr. McKay would like to settle this claim, so that he could have his driving privileges restored. The attorney stated that Mr. McKay was temporarily laid off as a maintenance man and expected to return to work in the near future, at which time he would borrow and offer to the State Highway Department $100.00 in full settlement of this claim. A draft in the amount of $100.00 was sent to the Claims Bureau on May 20,1966 by Mr. McKay.

In view of the circumstances involved, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of the Deputy Attorney General that Mr. McKay's offer in the amount of $100.00 in full settlement of the State Highway Department's claim against him be accepted and the balance of $170.51 be cancelled. (June 21, 1966)

Utilities - Central Railroad of New Jersey
Route 440, Section 2B

6 The Central Railroad of New Jersey has abandoned operations on its line which crosses Route 440 at Culver Avenue, Jersey City. The Railroad is desirous of removing a portion of the bridge over Route 440. The structure was built in 1933 by the State Highway Department at no cost to the Railroad. The Railroad is the fee owner of the right of way with the Department having an easement for highway purposes.

Since only a portion of the structure was to be removed by Railroad, an investigation was made to determine the feasibility of demolishing the entire bridge, rather than just the single span. The investigation revealed there would be no adverse affect to traffic during the removal, while also offering the advantage of improving the sight difference, elimination of two potential crash hazards, along with greatly improving the aesthetics in the area.

Due to the aforementioned benefits, the Central Railroad was requested to advertise their demolition project on two bases: (1) the removal of the single span and boring through Route 440 southbound for utility line relocations (the existing structure carries utility lines which must be maintained), (2) removal of the entire structure including the pier between the north and southbound roadways and contiguous to the shoulder of the northbound lane, and open cut through Route 440 for the rearrangement of the utility lines.

The project has been advertised and bids received with the LaFera Construction Company as the low bidder, Scheme 1 at $41,140, Scheme 2 at $88,900. The Railroad intends to award early this week, and unless some commitment is made by the Department, will demolish in accordance with Scheme 1.

There is undoubtedly benefit to the Department in permitting Railroad to award on the basis of Scheme 2 by providing the additional $47,760 to the Railroad for reimbursement by State of the additional work involved in Scheme 2. It is recommended that the Engineer of Utilities be authorized to inform the Railroad that $47,760 has been set up by Commission Action for the aforesaid purposes. (June 21, 1966)

**Services Engineering - VanWyk & Zanetakos, Inc.**
**Various State Highways throughout the State**

5 Approval and execution is recommended of the attached Agreement dated July 5, 1966 between Van Wyk and Zanetakos, Inc., Consultant, and the State of New Jersey covering understandings in connection with the performance of various field and office engineering services relative to construction of State Highways throughout New Jersey. The Consultant is to be remunerated for his services on an accumulative time-hourly rate fee based on approved schedule of classified hourly rates listed in the Agreement; plus repayment for requested printing and reproduction work toward ceiling of $1,000; payment for use of motor vehicles at $6.00 a day toward a ceiling of $3,000; payment for use of an Electronic Computer toward a ceiling of $1,600; toward a total ceiling of $25,000. It is, therefore, recommended that this amount be set up to cover the cost of engineering work called for under this Agreement. (July 7, 1966)

**Services Engineering - Edwards and Kelcey**
**Route 21**

6 Due to the comments made by the East Paterson Officials concerning the future section for River Road, it was necessary to perform additional studies to ascertain the ramifications of the request.

6 (Continued)
The alignment of Route 21 was shifted and discussions were held with the Department of Conservation to arrive at a satisfactory solution. The aforementioned studies are [illegible] additional work and compensation should be provided to the consultant. It is, therefore, recommended that an additional $20,000 be provided for services relative to the agreement with Edwards and Kelcey for Route 21, dated January 1, 1960. The ceiling will be increased by this amount. (July 6, 1966)

**Services Engineering - DeLeuw, Cather and Co.**
**Route 23**

7 Our agreement dated February 13, 1962 with De Leuw, Cather & Company, relative to engineering services for Route 23, contemplated "the design and construction contract plans for surface widening to four lanes, construction of barrier curb and jug-handles." The estimated construction cost for this work was $2,000,000.

It has now been determined that the estimate of construction cost, based on utilization of the unit prices included in the agreement, is 4.3 million dollars. The additional cost is due to a change from the original scope of work. The project has been designed for a variety of conditions, namely, both roadways on new alignment (both common and separate), without use of the existing pavement; existing pavement utilized for one roadway with other roadway on new alignment (separate and parallel). There is no barrier curb installation on the project. The structural work has been increased from $250,000 to $900,000. The project has also been lengthened from 4.1 to 4.4 miles.

Although an increase in construction cost is usually associated with a decrease in fee, it is felt that the aforementioned conditions have changed the scope sufficiently to permit the Department to maintain the fee at 4.25%. In order to provide the additional funds to reimburse the consultant, an additional approximate $100,000 is required. It is, therefore, recommended that this amount be set up. (July 1, 1966)

Agreement - John G. Reutter & Associates
Engineering Services - Rt. 130 Secs. 7E, 8D, 9D, 10

8 The final invoice has been submitted by John G. Reutter and associates relativ services for Route 130 covered in our agreement dated April 2, 1962.

To close the account an additional $2,649.42 is required. Additional funds are necessary because the consultant was requested to run trial computations in selected areas where the as-built pavement elevations were higher than the design grades, to determine where the overage of pavement was. These computations provided the answer sought by the Department.

It it, therefore, recommended that the aforementioned monies be provided, and this account be closed. (July 8, 1966)

**Jurisdictional Agreement - Monmouth County**
**Route 35, Section 8D**

9 Approval and execution is recommended of the attached Agreement dated July 6, 1966 between the County of Monmouth and the State of New Jersey covering understandings in connection with the apportionment of jurisdiction, control and maintenance relative to the State's construction of a jughandle type turning facility at the intersection of County Route 12A (Navesink River Road) with Route 35, Section 8D, the construction will entail improvement to portions of County Route 12A. (July 7, 1966)

**Utilities - City of New Brunswick**
**Route 18, Sections 2A & 1C**

10 **To accommodate the State's construction of ~~Route 18, Section~~ 2A and 1C, more particularly the replacement of the existing Lawrence Brook Bridge it was necessary for the City of New Brunswick to relocate certain municipally owned facilities serving their pumping station.**

**It is therefore recommended that the City of New Brunswick be reimbursed in t amount of $2,174.81 which amount covers their contract cost for the relocation wo (July 8, 1966)**

### Claims - Settlements

5 This claim arises out of an automobile accident which occurred at the Weighing Inspection Station, Division of Weights and Measure, Route 22, Somerville, New Jersey, and resulted in damage to a lighting pole in the parking area. It was eventually determined that the vehicle involved was owned and operated by one William McKinley Meadows who is a trucker and has various registration and driver licenses from various states.

Investigation by the Claims Bureau revealed that Mr. Meadows denied liability for the damage to state property. He subsequently alleged, after we finally located him in Detroit, Michigan, that there was no negligence on his part inasmuch as he had been directed to back up by a state trooper and in so doing struck the pole. The state trooper involved denied the allegation and advised this Bureau that the driver of the vehicle was simply directed into the weighing station and that he was not being directed when he struck the pole.

Mr. Meadows refused to pay this claim and the Claims Bureau therefore instituted suit against him in the Mercer County District Court. Judgment was subsequently rendered against the defendant by default on June 17, 1965. All attempts to collect this judgment from the defendant were unsuccessful. The Claims Bureau therefore in a final effort to collect all, or part of the judgment, consulted with the First Assistant Attorney General and was advised to refer this case to a Michigan attorney for collection. Suit was subsequently commenced by the law firm of Frazer & Popkin, Detroit, Michigan, for recovery of this judgment. They explored the possibility of collection after the defendant had offered $100.00 in full settlement. Further negotiations with the defendant resulted in his offer of $225.00, which our Michigan representative recommended be accepted.

Giving due consideration to the circumstances under which the accident occurred, the costs already incurred in processing this claim and the ultimate expenses involved should we attempt a full recovery, it is our opinion that the State would be justified in accepting the offer of $225.00, less attorney fee of one third.

It is my recommendation, therefore, that this offer of settlement receive favorable consideration, in accordance with Mr. Levine's memorandum dated July 27, 1966, attached hereto, and the recommendation of the Highway Department's Deputy Attorney General. (August 10, 1966)

## Design Items

### Route US46(1953), Section 15B

6 Approval is recommended of the plans and specifications for Route U.S. 46 (1953), Section 15B, Pedestrian Bridge at 6th Street and Incidental Work, Township of Saddle Brook, County of Bergen, and for authority to advertise this project for bids. (August 15, 1966)

### Rt. 80, Sec. 5G, Hackensack River Bridge - Pile Clusters

7 An oil barge struck and completely destroyed a pile cluster that was constructed in our Route 80, Section 5G Contract to protect the pier fender system from damage by floating objects for the bridge carrying Route 80 over the Hackensack River.

Due to the nature of the damage and the emergency aspect of the problem, it was felt that private negotiations with a few contractors would accelerate the replacement of the pile cluster for a reasonable cost. The Linde-Griffith Construction Company has submitted a low bid of $3,950 for the work.

The existing condition is considered to be an emergency, and it is recommended that the normal advertising procedure be waived for this project. It is, therefore, recommended that the sum of $3,950 be provided, and authorization be given to pay for the cost of the work as negotiated with the Linde-Griffith Construction Company.

Services - Engineering, Route 28
John J. Kassner & Co., Inc.

10 After consummating our agreement with John J. Kassner & Co., Inc. for the resurfacing of Route 28, the local officials requested consideration be given to the improvement of the Broad Street Intersection. The consultant has been instructed to prepare studies of this area.

To perform the additional services in connection with the aforementioned, an increase of $12,000 to the ceiling is required.

After the typical sections were approved by the Department and work had proceeded, the local officials objected to the six-foot widening proposed in our designs. A field review substantiated this claim, and the consultants were instructed to revise the plans accordingly. The additional cost assignable for this work is $7,000.

Drainage design for the Fanwood Railroad Station area, which was not included in the original agreement, was added to the project at an increased cost of $4,000.

**Claims - Settlements** ✓

6
This claim covers the cost of repairs to traffic signal equipment which was damaged on January 27, 1966 as a result of a motor vehicle accident occurring at the junction of Routes 1, 9, 21 & 22 in the City of Newark. One motor vehicle was involved in this accident. The vehicle was owned and operated by John A. Schimpf, 261 Amboy Avenue, Woodbridge, New Jersey. Cost of repairs for damaged property was $103.87.

Investigation by the Claims Bureau disclosed that Mr. Schimpf struck the traffic light post as he was backing out of the parking lot of a shopping center. Further investigation disclosed that there is some doubt as to whether Mr. Schimpf did the complete damage to this pole. The police and several merchants in the area stated that this particular pole got struck many times by many vehicles, and that the actual collapse of the pole, when Mr. Schimpf struck it, might have been due to the accumulation of the numerous strikings of the pole.

Upon contacting the insurance carrier for Mr. Schimpf, the Claims Bureau was informed that they felt that since their insured was one of many who may have struck this pole, they would not pay more than $75.00 on this claim.

The Claims Bureau discussed this claim with Mr. Salb of the Electrical Bureau and and was advised that the signal was rebuilt as recently as six months before the accident and that a salvage for the aluminum amounted to $9.40.

In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that the State would be justified in accepting the above offer of settlement rather than to attempt to recover the full amount of the claim by means of litigation. **(September 1, 1966)**

**Design Items**

Services - Engineering, Route 37
Taylor, Wiseman, Taylor & Sleeper

5 The scope of services contemplated during our negotiations with Taylor, Wiseman, Taylor & Sleeper for services in connection with Route 37 did not envision any right-of-way work. It was assumed that the roadway would be accommodated within the existing right of way, except at the areas of the jughandles. During the development of the contract, it was decided to place slopes outside of the existing right-of-way lines, thereby, changing the scope of services assignable to the right-of-way phase. The original contract contemplated approximately 35 parcels would be affected as compared to the revised number of 180.

The aforementioned change of the slope criteria affected the earthwork computations, which require the replotting of slopes and recalculating of earthwork quantities. In addition, the change in design standards since 1955, when this project was initially developed, caused some of the former work performed by the State to be revised or abandoned. The jughandle at Vaughn Avenue was deleted from the contract after the work was virtually completed, and it was decided to replace it with one at Coolidge Avenue. In view of the above increase in the scope of work and the extra work, additional funds must be provided for this project. An evaluation of the project indicates that the ceiling should be increased on this project from $95,000 to $125,000. It is, therefore, recommended that an additional $30,000 be set up. Route U.S. 130 (1953), Secs. 7E,8D,9D and 10D

26 The contract of South Jersey Construction Company, Riverside, New Jersey, for Route U.S. 130(1953), Sections 7E, 8D, 9D and 10D, by Commission Action dated February 14, 1964, was finally accepted and a semi-final payment authorized withholding 2½ percent of the value of the completed work pending receipt of the As-Built Quantities; final payment to be made without further Commission Action in accordance with the As-Built Quantities.

The specifications provide that the As-Built Quantity of FA-BC Pavement shall be adjusted for any excess tonnage as determined by elevations of the completed work.

The as-built elevations indicate that 3613 tons of material having a contract value of $28,904 has been placed in excess.

The contractor has taken exception to the accuracy of elevations originally established by the Department for layout and the final elevations. All engineering layout was performed by the Department and/or its consultant, however, an absolute check of the work can not be made as many of the previous controls have been removed or otherwise are not available.

The Department has secured increased benefit from the additional tonnage of FA-BC Pavement incorporated in the project and the contractor has incurred additional expense in furnishing the estimated excess material.

It is recommended that the provisions of the supplemental specifications pertaining to the adjustment of As-Built Quantities of FA-BC Pavement be waived, and in lieu thereof, the sum of $14,452 representing 50% of the contract value of 3613 tons of excess FA-BC Pavement be deducted from final payment, since the accuracy of the basis for estimating the excess is subject to question. (September 16, 1966)

Route 70, Section 1B ✓

**26** The contract for South Jersey Construction Company, Riverside, New Jersey, for Route 70, Section 1B, included construction of a concrete retaining wall within the right of way and adjacent to lands of Malcolm B. Wells, at a cost of $787.50 based upon bid prices for the several items involved.

At some earlier date, the owner requested that the wall be constructed similar to his existing wall and other additional walls that he expected to erect. Subject to discussions thereon, the owner further requested approval to have the wall constructed by private contract on his property with reimbursement by the Department in an amount not exceeding the cost of work provided in this contract.

In accordance with certain decisions and information given to Mr. Wells by field personnel, the owner had walls constructed on his property at a cost of $2,000. The Right of Way Division would not agree to provide reimbursement under the agreement for acquisition of property.

It is recommended that payment be authorized to Mr. Malcolm B. Wells in the amount of $787.50, as reimbursement for construction of a concrete retaining wall on lands adjacent to the right of way in lieu of comparable construction and costs accruing to the Department if constructed under the roadway contract.

Payment to be made on presentation of invoice and execution of proper releases of any claim and further maintenance. (September 21, 1966)

Route 78 - Removal of Rock Slide ✓

**27** On May 5, 1966, a rock slide involving an estimated quantity of 5,000 cubic yards of material occurred on the Jughandle Mountain cut of Route 78, Union Township, Hunterdon County. Due to the hazardous conditions imposed on traffic from falling rocks, the highway was closed and a detour established by our Maintenance Division.

It was considered to be in the best public interest by the responsible Assistant State Highway Engineer, that the highway be repaired and opened to traffic in the shortest possible time to eliminate the attendant circumstances of the detour. It was further determined that the removal of the rock slide could be best performed by a highway contractor without competitive bidding.

Public Constructors, Inc., Blackwood, New Jersey, were selected to perform the required work on a time and material basis, since they were known to be competent, efficient, reliable, possess the necessary equipment and were readily available on an adjacent contract.

It is recommended that payment be authorized in the amount of $30,274.46 for work performed and material furnished to accomplish the prescribed work. Payment shall be made from Maintenance funds. (September 22, 1966)

### Administration Items

Claims - Settlements

1 The State Highway Department is carrying three claims against McAllister Brothers arising out of accidents involving vessels owned by the Towing Company resulting in damage to the fender system at the Victory Bridge. The three claims as set forth below total $584.37.

| | | |
|---|---|---|
| D/A - 4/6/65 | Amt. of Claim - $156.66 | Involving Tug Dazellance |
| D/A - 5/2/65 | Amt. of Claim - $308.25 | Involving Tug Jeffrey McAllister |
| D/A - 2/13/66 | Amt. of Claim - $119.46 | Involving Tug A. J. McAllister |

Recent negotiations by the Claims Bureau with the Towing Company has now resulted in an offer of $500.00 in full settlement of all three claims.

The Towing Company has taken exception to our claim for $308.25 arising out of the accident occurring on May 2, 1965. It is their contention that they had no knowledge of being involved in this accident until they received our bill for the cost of repairs. They further contended that they were not given an opportunity to inspect the damage and make a survey of their own as to the cost of repairing said damages. It has been the practice of the Claims Bureau to contact the various towing companies for the purpose of arranging a survey when their vessels are involved in marine accidents resulting in damage to a Highway Department fender system. In this particular case, due to an oversight, the towing company was not advised of the accident at the time of its occurrence, nor were they given an opportunity to meet with our representatives in order to make a survey.

For the above reason we feel justified in recommending that the offer of $500.00 be accepted in full settlement of the three claims mentioned above and that the balance in the amount of $84.37 be cancelled in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack. (October 7, 1966)

Claims - Settlements

2 The State Highway Department is carrying a claim against Joseph Opdycke in the the amount of $77.50 arising out of an accident occurring on March 2, 1965 involving a vehicle owned and operated by Joseph Opdycke, and a vehicle owned by the New Jersey State Highway Department, assigned to Vincent Polcari. At the time of the accident, the Highway vehicle was parked in front of Mr. Polcari's home and Mr. Opdycke in backing out of his driveway across the street, backed into the left rear fender of the State car.

An estimate was obtained from Brunswick Body Works covering the cost of making necessary repairs in the amount of $77.50. Upon presenting Mr. Opdycke with our bill, he admitted causing damage to the fender of the State car but felt the charge of $77.50 was excessive in view of the damage he observed after pulling his car away. Our investigation also disclosed that Mr. Opdycke did not have liability and property damage insurance at the time of the accident. It was Mr. Opdycke's feeling that $25.00 should be sufficient to repair the damage which he caused by backing into our car. Subsequent negotiations by the Claims Bureau has now resulted in his offering $50.00 in full settlement of this claim.

In view of the circumstances and the fact that this debtor is not insured, it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack that the sum of $50.00 be accepted in full settlement of our claim as it would undoubtedly cost us more than the sum of $27.50 to institute a District Court Action in order to recover the full amount. (October 7, 1966)

## SCHEDULE OF APPROVALS - OCTOBER 25, 1966

### Administration Items

1

### Personnel Training - Title Searching

Recommend approval of the below described action.

A one hundred twenty-hour course in title searching to be conducted at the Holiday Inn, Monmouth Parkway and Route 36, West Long Branch, New Jersey, commencing November 7, 1966, and ending December 8, 1966. Approximately twenty-five newly appointed and currently employed Title Searchers will participate. This training is deemed an essential part of meeting the right of way commitments of the Department. It is hoped that completion of this program will reduce by thirty to fifty percent the on-the-job training necessary to bring a Title Searcher to full productivity. This should result in a fifty percent savings in employee salaries plus an undetermined savings in the supervisory training cost factor.

Accommodations and Texts—$3,200—includes facilities, luncheons, coffee breaks, use of blackboard, training supplies, text books, etc. (October 19, 1966)

### Project Agreement - Route 29 - U-198(20)

2 It is recommended that the attached project agreement in duplicate be approved and executed for Preliminary Engineering for N. J. Project U-198(20).

The total estimated cost is $420,000.00 of which fifty percent (50%) or $210,000.00 is Federal Urban funds.

The work to be performed under this agreement consists of Preliminary Engineering services necessary to provide complete construction and right of way plans within the subject termini. (October 19, 1966)

### Claims - Settlements

3 The State Highway Department is carrying a claim against County Wide Construction Company in the amount of $240.44 covering the cost of relocating a junction box in order to clear the construction of a driveway through a housing development. Upon presenting the Construction Company with the Highway Department's charges, they requested a conference with one of our representatives in order to discuss an unusual situation.

Mr. Frank Finetto, the owner of the County Wide Construction Company informed our representative that in December of 1963 at the construction site of the Stag Brook Estates between Route 208 and Jones Way, Wyckoff Township, Bergen County, he observed a headwall that started to give away. It was Mr. Finetto's fears that if this headwall gave away, it would cause severe damage to his project at Stag Brook Estates. He immediately notified the State Highway Department of the condition and Highway inspectors were sent to the scene to make an inspection. The Highway inspectors agreed with Mr. Finetto that the headwall was in bad shape and would have to be repaired. Inasmuch as the repairs were not made immediately, Mr. Finetto took it upon himself to repair the wall with his own men and with his own materials. When he received our bill for relocating the traffic box he requested that he be given credit for just the materials that he used to make the necessary repairs.

It was Mr. Finetto's fears that if the headwall had collapsed, it would cost over $1,000 to make necessary repairs. Inasmuch as the Highway Department was waiting to finish another project before attempting to make necessary repairs at the site in question, we feel Mr. Finetto's request was fair and reasonable. Before making a final determination, we requested the Highway Department to make an inspection of the repaired wall and give us an opinion as to whether the cost of materials amounting to $171.00 was correct. I am attaching, hereto, a copy of a memorandum addressed to the Claims Bureau by R. A. Peterson, District Superintendent, Maintenance and Operations, which is self-explanatory.

We have received from the County Wide Construction Company a check for $69.44 representing settlement of the State Highway Department's claim in full, after taking credit for $171.00 cost of materials used. It is therefore our recommendation that the check now in our possession for $69.44 be accepted in full settlement of the Electrical Division's Claim No. 5018 which is being carried on the Highway Department's books for $291.44 and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack. (October 21, 1966)

4

**Claims - Settlements**

This claim covers the cost of repairing vehicle bearing Reg. No. HYD 447 which was damaged on January 27, 1966 as a result of a motor vehicle accident occurring on Route 22 at the intersection of North Street, Bethelem Township, Hunterdon County, New Jersey. Two vehicles were involved in this accident; one owned by the New Jersey State Highway Department and one owned by David L. Young and operated by Linda Manning. Cost of repair for damaged property was $70.54.

Investigation by the Claims Bureau disclosed that Miss Manning was proceeding west on old Route 22 at 30 m.p.h. and was traveling to the east of the State Highway vehicle and to the left. As she was passing the State Highway vehicle, the State Highway vehicle made a left turn. She attempted to stop her vehicle but due to the icy conditions, she could not stop.

Upon contacting the insurance carrier for Mr. Young, the Claims Bureau was informed that there was no liability on the part of Miss Manning since the State Highway vehicle made a left turn directly in front of their insured's vehicle in order to turn around and proceed east on Route 22. Since it is obvious there was a strong possibility of contributory negligence in this matter, we negotiated a fifty percent settlement of the State's claim. We were tendered a draft in the amount of $35.27.

In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that this claim against David Young in the amount of $70.54 be settled for fifty percent, or $35.27, rather than incur additional expense in what would probably be a futile attempt to recover it through court proceedings. (October 25, 1966)

5

**Claims - Settlements**

Raymond Mikolajczyk, State Highway Foreman, sustained personal injuries arising out of an accident occurring on November 23, 1965 involving a third party, Michael Lukasewcz. As the result of said accident, the State Highway Department was required to expend the sum of $1,755.60 by way of medical treatment amounting to $105.60 and a permanent compensation award entered against the State Highway Department in the amount of $1,650.

Mr. Mikolajczyk has retained George J. Nicola, Esq. to represent him in his claim against the third party. Negotiations by Mr. Mikolajczyk's attorney with the third party's insurance carrier resulted in an original offer of $845 in full settlement of his claim which offer was rejected. Subsequent negotiations by Mr. Nicola has now resulted in the insurance company offering as their top and final figure the sum of $1,000. The attorney handling this case is inclined to accept this offer of settlement and has outlined his reasons for such acceptance in his letter addressed to the Claims Bureau dated September 22, 1966. I am attaching, hereto, Mr. Nicola's letter in which he outlines the proposed settlement, which is self-explanatory.

After carefully reviewing our file and giving due consideration to the small medical involved in this case, we are inclined to agree with Mr. Nicola that a jury would not in all probability return a favorable verdict in excess of $1,000 and the possibility always exists whereby the judgment, if a judgment was entered, could be for considerably less. In the event suit was instituted and the case continued on to actual trial, the State would also be subject to a statutory contribution to this employee's expenses of suit up to $200. Inasmuch as the attorney is turning over the entire settlement to the State subject to the statutory contribution toward his client's counsel fees, it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the approval of Deputy Attorney General William J. McCormack, that the offer of settlement as outlined in Mr. Nicola's letter receive favorable consideration and be approved. (October 25, 1966)

The award is not substantially in excess of the Fair Market Value Determination of $265,000., which is supported by the State's appraisals. The owner not having cross-appealed, it is understood that the trial attorney will move to dismiss the appeal filed by the State, pursuant to the Revised Rules of the N.J. The owner's demand of $29,000.00 for E12C2, 12C1, and 12C3, is considered excessive.

(November 14, 1966)

Services - Engineering
Madigan-Hyland, Inc.
Route 20

10 The designs previously approved for Route 20, from ~~approximately Station~~ 440 north to the Erie Railroad, have been discarded. Although not directly associated with this presentation, the designs north of the Erie Railroad may

also be discarded, since the officials have requested consideration for a new alignment. In order to compensate the consultant, Madigan-Hyland, it will be necessary to provide reimbursement for the discarded portions and treat the new design under the terms of the existing agreement dated August 31, 1962.

The consultant has expended a payroll of $97,861.11 for the original plans. Included in this amount, however, were costs for the completed Route 20, Section 2A project. The fee equivalent for this contract, divided by the multiplier 2, is $62,597.50, which when subtracted from the total payroll provides a salary figure of $35,263.61 of superseded monies. The latter number times 2 equates to $70,527.22, which is the total fee to the consultant on the entire length. It has been ascertained that the portion from Station 440 to the Erie Railroad constitutes 70% of the work. The consultant is due, therefore, $49,369.05.

In addition to the aforementioned design services, aerial and ground surveys were also discarded. On an equal acre basis the lower section computes to $1,754.40 for aerials and $4,537.83 for ground surveys. The sub-total is $65,661.28.

**Due to the extended time period for this project, it will be necessary to update the survey, including the utilities. It is estimated that this will cost $10,000. It is, therefore, recommended that the sum of $65,661.28 be set up to reimburse the consultant for discarded services.** (November 14, 1966)

The Railroad Company having subsequently advised that it was not in any position to process the claim nor make payment, the Title Bureau on July 16, 1965 was authorized to process the claim in the name of and for the Railroad Company and to make payment direct to the owner.

Possession of the property was taken by the Department on or about July 10, 1964, but due to certain legal problems involved payment was not made until October 17, 1966.

Claims - Settlements

5 This claim arises out of an automobile accident which occurred at the intersection of E. Broad Street and S. Pearl Street, Bridgeton, New Jersey, and involved a vehicle owned by Bertha M. Vanderbeck. As the result of the accident, traffic signal equipment was damaged and subsequently repaired at a cost of $329.18.

Investigation by the Claims Bureau revealed that subject vehicle was uninsured at the time of this occurrence. The Claims Bureau was unsuccessful in its efforts to collect this claim and notice was received that the debtor had filed a Petition in Bankruptcy. In this respect, the Claims Bureau was advised that there were no assets available for distribution to the creditors.

Giving due consideration to the debtor's financial status and the ultimate cost involved should the Claims Bureau expend further time and effort to collect this claim, it is our opinion that the State would be justified in closing this file.

It is my recommendation, therefore, that this claim be cancelled in accordance with Mr. Levine's memorandum dated August 22, 1966, attached hereto, and the recommendation of the State Highway Department Deputy Attorney General.

Claims - Settlements

6 This claim arises out of an accident occurring on February 9,1966 on Route 46 and Phillips Avenue, South Hackensack, New Jersey involving a vehicle owned by Duthler Ford Leasing, Inc. and operated by Lawrence English. At the aforesaid time and place the vehicle involved was maneuvering out of a parking slot and as the vehicle rolled back slowly it struck a traffic light and said light fell over. The State Highway Department owned traffic pole had to be repaired at a cost of $221.97. It was the contention of the insurance company involved that the light pole involved had been struck on numerous occasions by other cars, which weakened the pole, and that their assured only nudged the pole lightly, which caused it to fall over. They turned down our claim on this basis.

The Claims Bureau then contacted the proper personnel in the Electrical Bureau of the Highway Department, who confirmed that the pole in question had been struck at various times due to cars backing out of the parking lot where the pole was located. To eliminate this problem the Electrical Bureau had the Maintenance Department of the State Highway Department erect a steel guard rail around the pole for protection. We have now persuaded the insurance carrier involved to settle our claim on a near 50% basis.

In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that their offer of settlement in the amount of $110.86 be accepted and the balance in the amount of $111.11 be cancelled.

2 It is recommended that a total commitment of $54,200.00 with Federal Urban funds in the amount of $27,100.00 be made on the State Highway Department records as of October 25, 1966. ### Design Items

Detour - Route 7, Section 1A

3 There is presented herewith a map showing the proposed detour to be established and maintained during the construction of Route 7, Section 1A, Passaic River to Route 17, Town of Kearny and Borough of North Arlington, Hudson County.

Traffic will use Kearny, Bennett, and Passaic Avenues during the construction for a maximum period of three (3) months beginning approximately April 1, 1967.

The estimated cost of signing and maintaining this detour is $4,600.00.

It is recommended that the detour be officially adopted and authority be given for setting up the sum of $4,600.00 to cover the cost of maintenance and signing.

Construction funds to be used and costs charged to the above-captioned project. (December 2, 1966)

Route 78, Section 5U

4 On November 23, 1966 bids were received for the Interstate Route 78, Section 5U project. Only two bids were received. The apparent low bidder's cost was approximately 28% over the approved engineer's estimate.

An analysis of the bids has been made. Differences are evident in the major structural items: structural steel, reinforcement steel and concrete. While there is some indeterminacies due to the recent economic trends, the increase indicated in these items cannot be substantiated. Some adjustment, however, is undoubtedly required although it is difficult to determine why or how much.

The apparent low bidder was very high in all pipe items. There is no logical reason for this. The other items in question are the concrete pavement, the borrow, the roadway excavation and lump sum items. Some adjustment in the earthwork items can be recognized, but only to a small degree.

In view of the aforementioned, it is recommended that the bids be rejected and that the project be readvertised. It is also recommended that the former engineer's estimate be increased (by approximately 5%.) (November 30, 1966)

5 Route 87 (1953), Section 1B

No bids were received for this project on November 23, 1966.

Subsequently, a map revision was received and Parcel 12C was re-designated as Parcel E12C2, Quaker Holding Co., and Parcels 12C1 and E12C3, Levitt & Sons, Inc.

By commission action dated October 31, 1966, authority was granted to institute condemnation proceedings for the acquisition of Parcel E12C2 and to rescind condemnation proceedings which had been authorized for Parcel 12C on November 16, 1965.

Owner's demand of $29,000. for Parcels 12C1, E12C2 and E12C3 is considered excessive.

Should, prior to the ultimate fixing of compensation, any provisions or proceedings relating to the acquisition of this property delay the taking of possession and use thereof by the Highway Department, authority is requested to then file a declaration of taking and to deposit with the court $575.

It is therefore recommended that authority be granted to institute condemnation proceedings for the acquisition of these parcels in fee simple, subject to any public utilities existing in the premises.

Condemnation proceedings were previously authorized by the Commissioner for the transmittal of all papers for Parcel UER39A to the Tidewater Pipe Company on July 26, 1965 and for Parcel UE39B on July 27, 1965. These parcels were required for the relocation of the Tidewater Pipe Company's pipe line. Subsequently, our Engineers advised that a larger area was required for Parcel 39B and the parcel is now designated as Parcel R39B.
